Plati 110

Smartfill available

Collection: Elevate

Left corner bath

Right corner bath

Corner freestanding bath – 1500 mm

Features

Sleek and practical, this minimalist design combines the beauty of a freestanding bath with the practicality of a bath that sits flush against two corner walls. Perfect for compact bathrooms. Sits flush against corner walls

- Seamless design
- White sanitary grade acrylic, White Gloss
- Excellent heat retention properties
- Adjustable support feet

Available in 3 configuration options

- **OPTION 1** Bath with No Overflow
- **OPTION 2** Bath with Overflow
- **OPTION 3** Bath with Smartfill System (bath filler and overflow)

Installation

Refer to installation instructions.

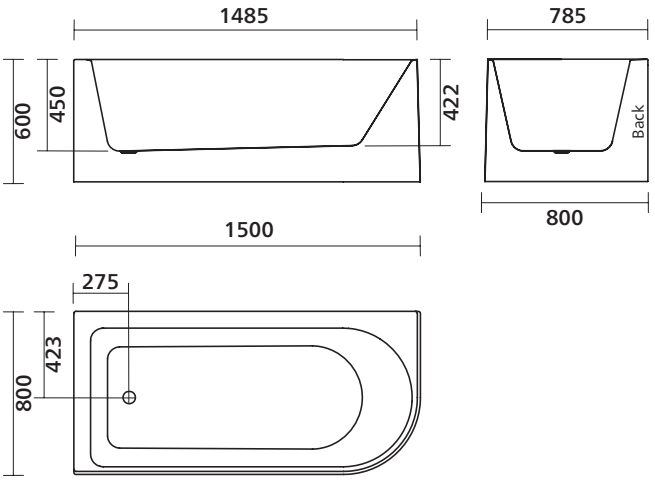
The bath is supplied with four adjustable support feet on the base frame of the bath. Position the bath and use the adjustable feet to level the bath. Leave a 3mm void between the base of the bath and the floor. Use silicone around the base to seal the bath to the floor. Allow a 20mm gap in the silicone seal as a weephole (gap is designed to reveal any plumbing leakage).

Use acetic cured silicone sealant. Do not use epoxy type adhesives.

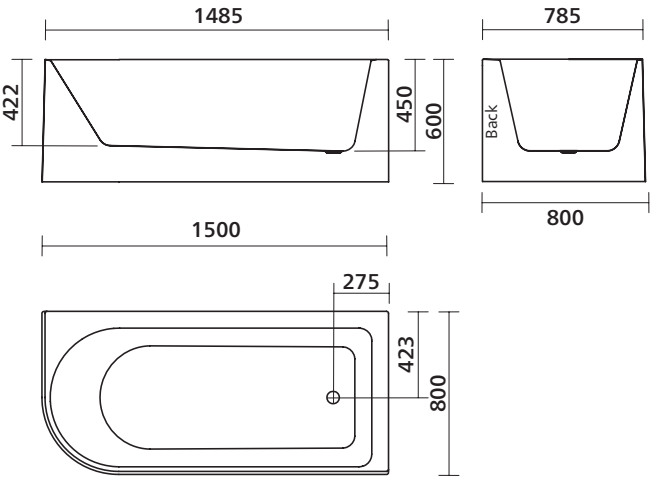
Order codes

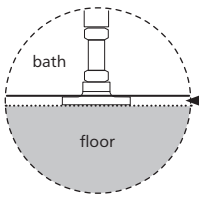
See next page for order codes.

LEFT CORNER BATH



RIGHT CORNER BATH





Leave a 3mm gap between base of bath and floor. Use silicone to seal base of bath to floor, leaving a 20mm weephole.

Planning Guide for baths to be installed with

Smartfill®

Bath filler + overflow by Seima

Important !

Must be installed by a licensed plumber in accordance with Australian Standard AS3500 and meet all requirements of local licensing authorities.

Smartfill system includes FlexiWaste overflow kit with Pop-out bath waste

Smartfill Planning + Pre-lay Guide

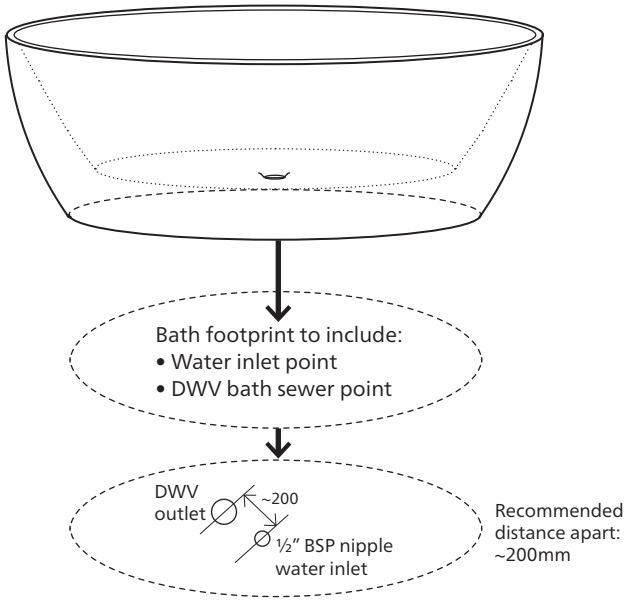
The plumbing set-up for Smartfill normally requires advance planning, to place the plumbing inlet and outlet in the best positions for your bath location.

The Smartfill system simply requires the plumbing to be placed under the bath within the bath footprint:

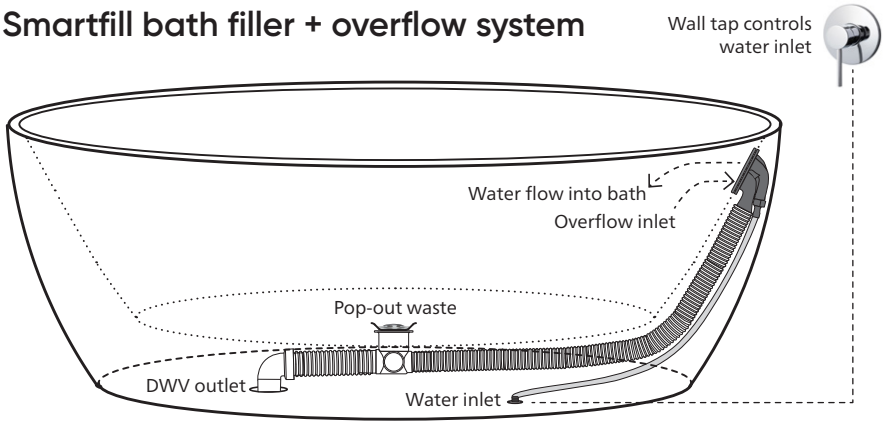
- **Water Inlet Point**
  ½" BSP nipple — to protrude a minimum of 30mm above FFL (finished floor level).

  (This water point will be controlled via a wall mixer or other tapware, to fill the bath.)
- **DWV Bath Sewer Point**
  Water outlet

The water inlet nipple and waste outlet pipe can be placed anywhere within the footprint of the bath and there must be sufficient clearance for connection pipes. The recommended distance between the Water Inlet Point and DWV Point is around 200mm but this is not essential.



Smartfill bath filler + overflow system



Smartfill has two elements of **backflow prevention** built in to the device. Smartfill passes AS2845:2:1996 for backflow prevention with included air gap and also has a dual check valve (DualCV). WM Cert 23422.
